

ORION: Defining Accuracy with MRI-Visible HDR Brachytherapy Markers for Prostate and GYN Cancers

Flexible planning line marker with unmatched MRI clarity, enabling precise applicator and interstitial needle visualization for confidence in HDR treatment planning and delivery.

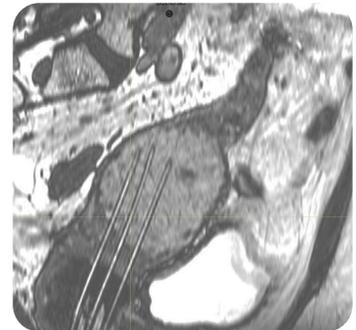

Why Choose ORION?

ORION provides unmatched MRI clarity for HDR brachytherapy, enabling precise applicator and interstitial needle localization and dwell position verification. Its flexible design enhances treatment accuracy in prostate and gynecological cancers.

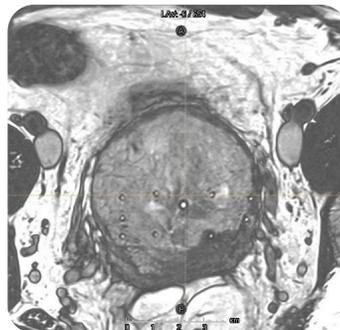

MRI Clarity, Without Compromise.

Enhanced MRI clarity for localization and dwell position verification.

Precision in Prostate & GYN Cancer Treatment.

Purpose-built to optimize accuracy in prostate and GYN HDR planning.

Confidence in Treatment Delivery.

Strengthens treatment accuracy with clear guidance for planning and verification.
